7 KM/H

RANGE

25-30 KM

MOTOR POWER

2 X 250 WATTS

A newly designed suspension system provides improved agility with a smooth and comfortable ride

Front and rear tie-down points add stability during transportation

C300 CANTO

You will now find the sleek design and high-calibre performance you would expect from high-quality electric wheelchairs in the brand new C300. No other electric wheelchair in this class can offer such a perfect blend of stability and agility at the best overall price. Permobil's passion for engineering gives you an even wider choice than ever before.

The Canto seating system is flexible and modular in construction. The seating system can thus be configured in line with the wishes of users and therapists as regards seating comfort. Comfortable seating, capable of being individually tailored, simple controls and easy redeployment are features of the Canto seating system. The best possible value for money is achieved by using standard components.

Armrest height can be easily adjusted

Fold-up footrests

Comfortable seating is a feature of the Canto seating system

Electric seat lift
