# bootie 4

The new **Strider bootie 4** has been designed to be both portable and lightweight, with ease of use in mind. With key features such as a 3-step dismantling system the scooter can be easily taken apart in seconds. By simply pulling the lock mechanism upward and tilting it back, you can lift the front section right off, making it even easier to transport in your car.

Other key features such as wireless connections, means that the scooter can be assembled as easily as it was taken apart, due to the fact that there are no wires or plugs to worry about. Lifting the scooter has never been easier. With the heaviest part weighing only 14kg (31lbs) and a user weight capacity of 114kgs (18 stone), the bootie 3 and bootie 4 really do make the perfect travel companions.
