

**Yes, you can.<sup>®</sup>**

## **Invacare<sup>®</sup> Meteor**

### **Control your freedom...**

The *Invacare<sup>®</sup> Meteor* provides you with complete freedom to enjoy total independent travelling. With emphasis on safety, user friendliness and unique driving capabilities this robust scooter enables you to overcome high kerbs, uneven surfaces and to go up steep slopes. This powerful scooter has been designed to carry a load of up to 200 kg.

The *Meteor* possesses logical "easy access" controls and multiple adjustable features ensuring a comfortable and safe drive.

### ➤ **Safe and stress-free driving**

Designed for comfort and safety the *Invacare® Meteor* allows you complete independence. The stylish scooter incorporates a powerful motor and is highly manoeuvrable due to the unique tiller design and the adjustable four-wheel suspension system. The chassis has the ability to carry high capacity batteries enabling long country drives.

### ➤ **For your ease and independence**

This stable, compact scooter offers spacious legroom for a relaxed and pleasant drive. A convenient driving position can be obtained by adjusting seat height and horizontal seat position. The armrests are width and height adjustable, with a reclining backrest that can be angled to your requirements. Finally, the swivel seat and swing-up armrests allow easy transfer both on and off of the *Meteor*.

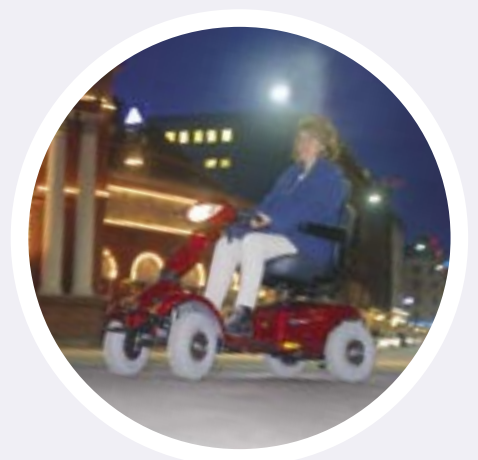

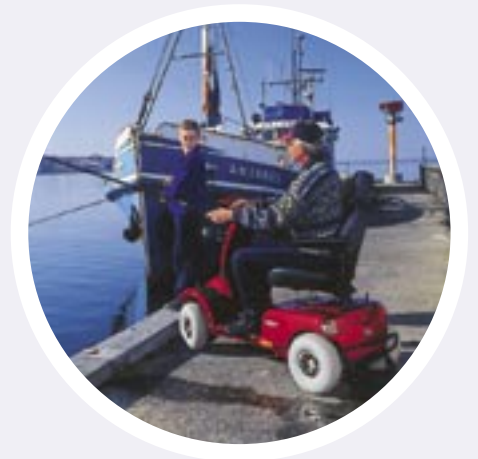

### ➤ **Ensure a comfortable driving experience**

A uniquely designed tiller allows the user to easily adapt the tiller angle to an optimal driving position while ensuring the controls are in clear view at all times. The easy touch buttons respond immediately and a small yellow light will indicate when the button is activated. By using either the "speed dial" or the "speed switch" to change from full speed to relaxed speed.

### ➤ **For your individual preferences**

The electronics are programmable providing you with driving parameters according to your personal requirements. The *Meteor* incorporates two charging points to suit your preference, - one in the front of the chassis shroud and a second at the tiller head.

The *Meteor* is equipped with an approved road standard light system. The headlight lights up the street independently of the tiller angle.

The spacious control panel includes

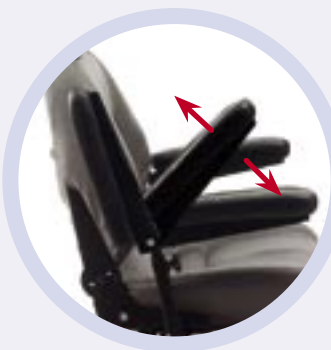

- "Easy touch" buttons
- Illuminating diodes when button is activated
- Accurate easy readable battery indicator
- Handy "Speed dial"

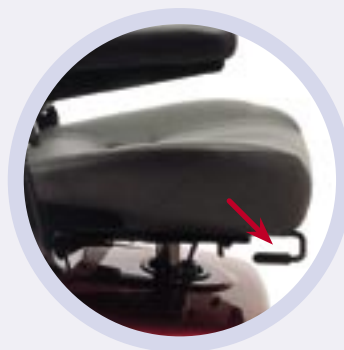

Easy accessible handle for finite adjustment of tiller

The headlight highlights the street independently of the tiller angle

The "flip-up" armrests are width, angle and height adjustable

7" sliding rails allows adjustment of the seat position

Charging point for off-board charger
