

HIPPO

Electric indoor/outdoor wheelchair

Moving about, playing and discovering are all part of the development of a young child. For children with physical limitations there is no difference. Through the Hippo (with its standard electric high / low and tilt adjustments) movingpeople.net has brought a wheelchair to the market which allows a child to develop completely and function independently in total safety. Their designers have

been careful not to overlook the importance of the Hippo's appearance. During presentations and assessments, words such as "cool" and "wicked" are the order of the day. The powerful motors combined with the smooth electronics of the Hippo ensure perfect performance and safety. In addition, the Hippo's front wheel drive makes it highly manoeuvrable.

YOUR LIFE, OUR DRIVE

HIPPO

The Hippo is delivered with the Optium Support System as standard. The OSS, part of the Kid-Fit seating system, offers support where needed and is very comfortable. In addition to the OSS, a complete range of seats and backrests is available. Both seating systems, and the Hippo with them, can grow along with your child.

The Hippo is fitted with a central leg rest and headrest as standard. In addition to the electric high/low and tilt adjustments, an electric backrest adjustment and electric leg rests are available as options.

A range of accessories is available for the standard Hippo which is in itself already very well equipped.

SPECIFICATIONS

weight capacity	kg / stone	60	9,5
wheelchair weight (excl. batteries)	kg / stone	92	14,5.
