

***Optimal
seating posture
for everyone!***

Sedeo® more than just good cushions!

For over 25 years movingpeople.net has successfully developed, produced and distributed unique mobility products.

The innovative, adjustable Sedeo® seating system is an example of our comprehensive seating and positioning range. The Sedeo® system is used on a broad range of manual and powerchairs.

movingpeople.net has a program of continuous product improvement and is introducing this new generation of Sedeo® cushions and seating options. The primary design criteria were comfort, versatility and modern look.

Sedeo® : more than just good cushions

Sitting posture requires more than choosing the right cushions. Careful adjustment to obtain the right sitting and backrest angles is also important. The Sedeo® seat system provides you with the optimal sitting posture. Sedeo® consists of an individually adjustable frame onto which a variety of seating and positioning components can easily be fitted.

The combination of modular construction and width adjustments provide a unique customized seating system for each individual.

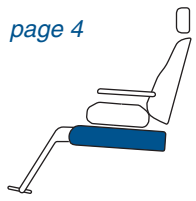

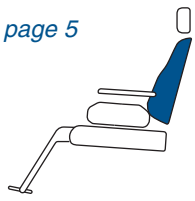

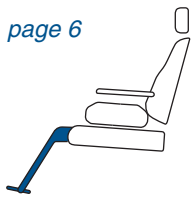

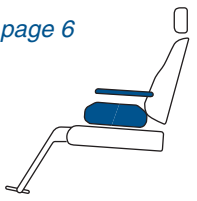

People will enjoy and use their mobility product more when they have the proper body position. The Sedeo® seat system supports the entire body, providing the user with optimum comfort.

Benefits:

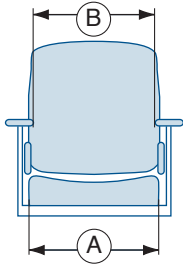

- *Adjustable*
- *Optimum comfort for the client*
- *Numerous options*
- *Unparalleled versatility*
- *Upholstered with comfortable Sellaskin®*
- *Modular construction*
- *Available for all movingpeople.net manual and active chairs*

SEATWIDTH (A)	SUITABLE FOR HIP MEASUREMENTS (B)
15" (Robin only)	13.5" to 15.5"
16.5"	15" to 17"
18"	16.5" to 18.5"
19.5"	18" to 20"

MOUNTING

A. The backrest can be mounted at two different heights.

B. Various seat depths can be achieved using just one seat cushion by mounting the cushion in different positions.

Upholstery

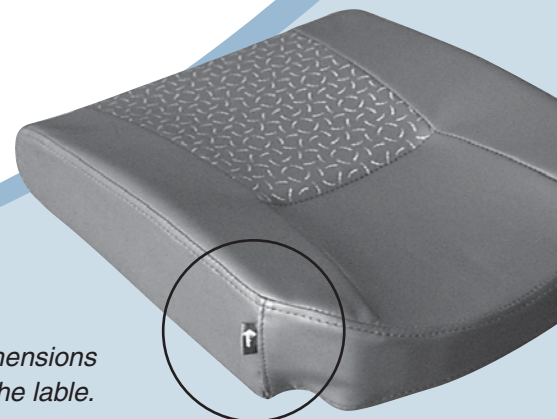

All Sedeo® components are available in black Sellaskin®.

Sellaskin® is a soft and comfortable material.

Other seats are upholstered in black stretch rubber for extra comfort.

Backrests in black stretch fabric also provide extra comfort.

The seats and backrests can also be provided in fabric.

The cushions' dimensions are indicated on the label.

Look for the original Sedeo®-label!

Seats

Width sizes 16.5 – 18 – 19.5 inch

Depth sizes 17.5 – 19 inch

1 Standard seat

- Profiled
- Sellaskin® upholstery

2 Seat with webbing

- Profiled
- Improved sitting position due to webbing
- Stretch rubber upholstery
- Filled with extra soft polyethelene

3 Memory foam seat

- Profiled
- Filled with memory foam
- Good pressure distribution
- Stretch rubber upholstery

4 Support seat

- Contoured
- Design prevents slumping
- Provides pressure distribution
- Filled with various types of extra soft polyethelene
- Stretch rubber upholstery

5 Balance seat

- The special internal construction supports the thigh bone condyles to minimize pressure on the tailbone condyles (coccyx)
- Excellent pressure distribution
- High lateral stability
- Design prevents slumping
- Stretch rubber upholstery

6 Pan seat

- Depth-adjustable rear threshold
- Universal solution for various anti-decubitus cushions
- Adjustment range 15 – 18 inch
- Sellaskin® upholstery

7 Arthrodesis seat

- Suitable for people with stiff or deformed hip joints
- Sellaskin® upholstery

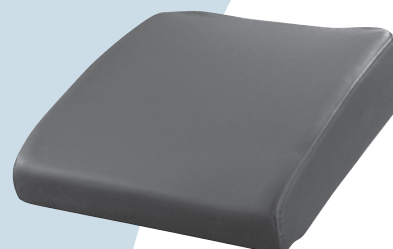

This seat must be used in a separate frame. It is advisable to combine this seat with comfortable legrests to support the leg at the right angle and prevent the client from slumping in the chair.
