

IBIS X-Series

PUSH WHEELCHAIR - MANUAL/FOOT-PROPELING WHEELCHAIR - ELECTRIC WHEELCHAIR

YOUR LIFE, OUR DRIVE

IBIS X-Series

Unbelievably versatile

A SOLUTION FOR EVERYONE

The Ibis X-Series provides maximum comfort and mobility for the more dependent individual. The impressive design provides a range that extends from a push wheelchair, a manual/foot-propelling wheelchair to an electric model. And all this is based on one, width adjustable frame with tilt-in-space adjustment, offering an optimal solution for everyone.

COMFORT

Perfect seating posture is crucial, especially if you have to sit in a wheelchair for long periods of time. The fully individually adjustable Sedeo® seating system provides excellent support and maximum comfort. With up to 30° tilt-in-space adjustment, optimal variation in seating posture is guaranteed. This can easily be operated by the person in the wheelchair or the carer.

EASY TO USE

Ease of use is an absolute must for everyone using a wheelchair. Yet, this is equally important for the therapist or carer, especially in the case of a comfort wheelchair. The Ibis X-Series incorporates an easy to operate tilt-in-space adjustment and can be moved with great ease. The push wheelchair is available with PowerSupport attendant control, offering extra support when needed. The electric model is very easy to drive, and easy to get in and out.

INDIVIDUALLY ADJUSTABLE

Due to its modular design and wide range of adjustment options every Ibis X-Series wheelchair can be easily customized to suit the specific requirements of the individual, even if his or her physical condition changes. At the same time, the wheelchair can be adjusted to suit anyone and is, therefore, very easy to re-use, which is a crucial factor in a nursing home. The maximum user weight is 160 kg.

PERFECT TO DRIVE

The Ibis X-Series offers excellent driving characteristics, also due to the adjustable wheel position and unparalleled seat width adjustment. Whether the person in the wheelchair moves the wheelchair or is being pushed, each model ensures a smooth and comfortable ride. Maximum manoeuvrability is guaranteed, also with the compact electric version, available as FWD or RWD for total flexibility. Because the Ibis X-Series combines a very low seat height - from 39 cm - with plenty of leg space, it also allows easy foot-propelling.

RELIABILITY

movingpeople.net wheelchairs have built a solid reputation in Dutch nursing homes as well as abroad, and there is a very good reason for that. Quality and reliability are guaranteed. The Ibis X-Series also proves that durability and a modern design go perfectly together.
