Please follow this measuring method:

The following method is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.

Seat width (SW):

- a) For the user: Allow space between sideguard and hip on each side of the chair
(approx. 1 - 2 cm altogether)
- b) On the wheelchair: From outside frame tube to outside frame tube.

Seat depth (SD):

- a) For the user: When sitting upright: leave space for 2 - 3 fingers between
front edge of the seat upholstery and back of knee.
(approx. 3 - 6 cm). Care must be taken with adj. upholstery.
- b) On the wheelchair: From back tube to front of seat upholstery.

Front seat height:

- a) For the user: When sitting with 90° knee angle:
From back of knee to bottom of shoe sole.
- b) On the wheelchair: From front of seat tube to the ground.
(min. 3 cm longer than user measurement)
Remember to include the cushion height.

Rear seat height:

- b) On the wheelchair: From back of seat tube to the ground.
Note: Max. seat height difference rear to front is 13 cm

Back height:

- a) For the user: From the seat, including cushion, to be no more than 1 - 2 cm below the lower shoulder blade.
- b) On the wheelchair: From back of seat tube to upper edge of backrest upholstery.
Note: The user's ability to sit upright has a major influence on the
back height and it can therefore differ considerably

Back angle:

Important: The back height depends on the degree of disability.
0° is the angle 90° to the ground. Negative angles are < 90°
and positive angles are > 90°.

Technical Data Overview - Life RT:

Max. overall height:	95 cm		
Max. overall length:	107,5 cm		
Max. turning circle:	70 cm		
Max. safe slope:	10°		
Wheelchair weight:	from 10 kg		
Dismantled weight:	from 8 kg		
Weight of heaviest part:	2,1 kg		
Max. overall width:	Camber	22" rear wheel	24" rear wheel
	For 0° camber:	SW + 20 cm	SW + 20 cm
	For 3° camber:	SW + 23 cm	SW + 24 cm
	For 6° camber:	SW + 25cm	SW + 26 cm

Product is **crash tested according to ISO 7176-19** and therefore approved for transportation in a vehicle
For transport without a user the chair must be safe clamped in the vehicle

All changes in the configuration might change the seat heights.
Manufacturing tolerances of +/- 1 cm
