SEATING OPTIONS

The contoured medium-back style seats are designed to be used by clients who are not at risk for skin breakdown and who have little or no special positioning needs. These seating options make the transition from a scooter to a power chair much easier for these clients. Angle-adjustable back hinges are standard with the medium-back seats

Economy Seat

Modular Seat

The Modular Seat is designed for clients who need to sit for longer periods but who are not at risk of skin breakdown. Its cloth upholstery, high back and adjustable lumbar support combined with a manual tilt feature as standard make it ideal for this purpose. The seat is available in two widths 16" and 18" and three depths 16", 18" and 20".

Euro Comfort Seat

The Euro Comfort Seat offers increased levels of comfort and support. A combination of ergonomically shaped seat and back cushions, and a manual recline feature offered, means a wide range of clients needs can be catered for. The Euro Comfort Seat can be upgraded to powered tilt and recline.

Synergy® Seating Systems

The Quantum Synergy Seating System offers a clean, streamlined appearance and unparalleled ease of adjustment. The seating system's unique design allows for height, width, depth, and back angle adjustments to be made quickly and easily in the field. The Synergy Seat interfaces with most types of seat and back cushions, and is designed to be the most user-friendly system available today.
