Rascal 6 series: designed for life

Rascal 600T

suspension provides a smooth ride over most surfaces and the upgraded seats – which swivel a full 360° and have six lockable positions – offer unparalleled comfort on long distance journeys.

The 600F is the latest in a series of popular 4mph, 4-wheeled scooters from Electric Mobility with the 615 model giving extra speed, without compromising quality or comfort. For those people preferring a Class 3 on-road scooter, the 625 is the perfect solution, with a top speed of 8mph, chunky 12" wheels and a high backed, fully adjustable seat. The upgraded controller and performance puts the 625 in a class of its own.

The 600T 3-wheeled scooter

The 600T brings an extra dimension to the Rascal 6 series by offering greater manoeuvrability and extra legroom.

The 600T is a sturdy yet nippy 3-wheeled scooter, ideally suited to narrow supermarket aisles and other confined spaces because the single front wheel gives an excellent turning radius and the small castor wheels increase stability. The multi-position tiller and lift-up arm rests allow individually tailored riding positions and ease of access.

The 600C powerchair

Making its own individual mark on an outstanding series is the 600C powerchair. Its open front and side mounted tiller offer increased access to working surfaces such as desks, kitchens and tabletops. Perfect for the home or office environment due to its outstanding turning circle, the 600C has been designed to fit into your lifestyle with the minimum of fuss. Although not designed for extended outdoor use, the 600C takes a visit to the shops or a trip around town in its stride.

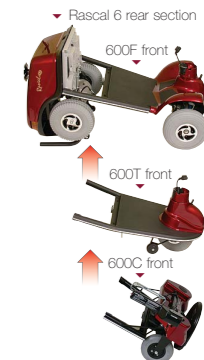

Rascal 600C

3 in 1

Unique to the Rascal 6 series is the ConvertAble™ option. Designed around a universal rear scooter section, this patented feature allows the owner of a 600F 4-wheeler to convert to a 600T 3-wheeler or a 600C powerchair, simply by buying a second front section. The conversion can be achieved in a matter of minutes without the use of any tools.

This truly remarkable feature not only gives up to three products in one package, but also enables a vehicle to be changed, as the owners needs change.

The Rascal 6 series from Electric Mobility is the latest generation of the ever-popular range of mobility vehicles incorporating the patented ConvertAble™ option. With over 20 years experience of design innovation the Rascal remains the ideal transport solution for people with different mobility requirements.

Designed with one aim in mind – to make your life as easy as possible – the range includes three 4-wheeled scooters: the 625, 615 and 600F, a 3-wheeled scooter, the 600T, and for those people more familiar with a powerchair, the 600C.

For peace of mind, each model in the Rascal 6 series comes with a lifetime frame guarantee and is fitted with the very latest digital controller to ensure an ultra-smooth start/stop process. The 'one-hand' controls and easy-to-read dash components also make driving a Rascal a

relaxing and enjoyable experience and the bright halogen headlight helps make your journey safe when the light is poor. All models have a 'whisper quiet' drive train for near silent running and a convenient on-board battery charger.

The Rascal 6 series has been designed to allow easy access to key components ensuring trouble free servicing by Electric Mobility's nationwide dealer network.

All models are built to the highest standard, using quality materials, enabling a maximum user weight of up to 32 stone.

The 625, 615 and 600F 4-wheeled scooters

These three models feature identical modern, sleek front ends and smooth, sculpted rear sections making them exceptionally eye-catching whilst the feature-packed specification makes them a joy to ride. A perfect combination – good looks and quality performance.

The multi-position tiller and lift-up arm rests allow personally tailored riding positions and ease of access. The individual coil spring
