# Breezy 300

Total weight from only **13.5** kg!

It's stylish design combined with the most advanced technology used in production enables Breezy 300 to offer wheelchair users the most modern look, robust construction and one of the lightest wheelchairs in the standard aluminium market.

## Light weight

The advanced design of the Breezy 300 combined with the technology used in its production enables this chair to be one of the lightest standard aluminium wheelchairs in the market at only 13.5 Kg (complete), easy transfer and storage are possible.

## Stylish

A very modern look with many design details gives to this wheel chair a fresh and distinctive image.

## Robust

The new crossbar design for the Breezy 300 provides the chair with additional strength making it very robust but avoids adding any additional weight to the chair.

All of the critical functional parts of the chairs have been designed to make it much easier for users to operate.

The footrests are detachable but also can be folded in and out of the chair. This is very convenient to make the chair more compact for small spaces, such as lifts, toilets and indoor areas.

The armrests are swing away and also detachable. The position and form of the detaching latches in the armrest were designed to ease this operation.

The mechanism for the removal of the footrests is large, accessible and very simple to users or carers to operate.

## Options and Accesories

The Breezy 300 has many options and accessories to be adapted to the different consumer needs.

- Half folding back
- Rear wheels 600 mm
- Quick release axle
- Solid castors
- Solid rear wheels
- Anti tip wheels
- Transit wheels

All of the critical functional parts of the chair have been designed to make it much easier for users to operate. The mechanism for the removal of the footrests is large, accesible and very simple to users or carers to operate.
