

**“The Argon Ti gives me style,
with strength, pureness
and integrity”**

Annemarie Postma,

**model and writer, has an extremely health
conscious attitude.**

Over the last 20 years she has done personal research into healthy foods and habits of life to stay energetic and optimise her body weight whilst having a seated life. And it shows; she has an international modelling career, is a successful columnist and writes bestselling books.

Essential and integral to Annemarie's attitude to life is her Argon Ti. She demands the purest material, the lightest weight and optimal positioning, that can be fine-tuned over time.

Argon Ti

Pure custom looks

- Pure looks in titanium or designate your custom colour and technology format!
- Special frames, backrests, side guards, castors for a designer look!
- Fine, easy adjustments to design to your individual handling and personal style.
- Titanium: your complete adjustable chair weighs from just 7.6 Kilos!*

*depending on specification and options.

The new Argon Ti

The lightest adjustable, best performing chair just got better!

Top class riding performance, outstanding frame rigidity and super lightweight – this is what the user with a pure attitude demands. And the Quickie answer was to take the strength and ride performance of the Argon, marry it with our expertise in titanium technology and develop the next generation of Ti wheelchair.

Ultimate customization

The enhanced and improved adjustability allows you to continually optimise in-chair performance helping realise a perfect fit and positioning, regardless of personal or environmental changes. New hardware for simple adjustment of the backrest and seat heights along with individual choices of frames and backs – all ensure your chair readily exceeds all your needs!

Innovative backrest system offering angle adjustment from -8° to +12°

Long and short axle plate

Wide sideguard range, including carbon fibre and aluminium

Leather upholstery

Two different castor widths allow small and wide castors

Wide castor range

Compact wheel lock folds away nicely below the frame

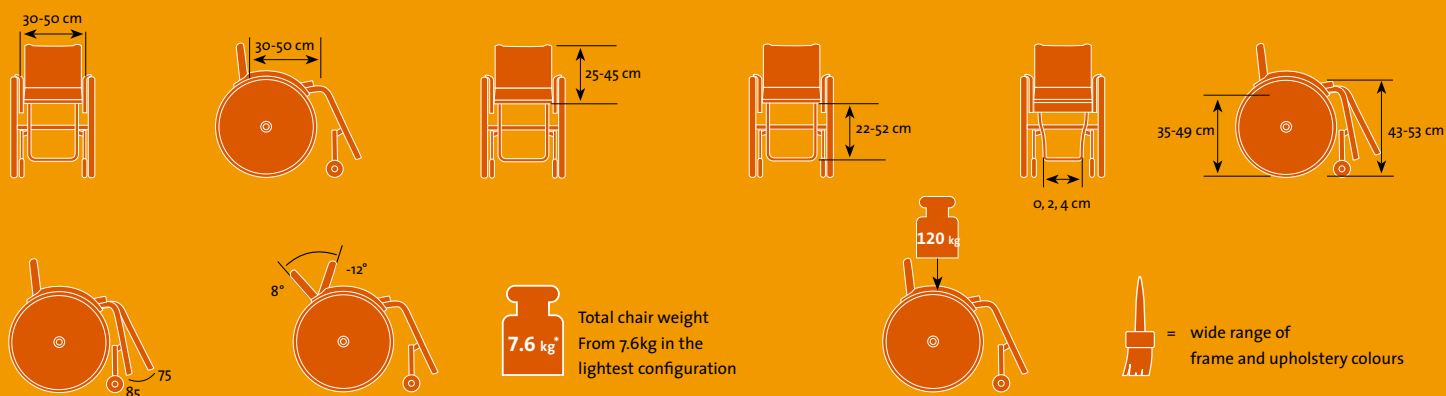

Suspension

“Life is my Passion.”

Through use of the highest grade titanium and innovative and easy adjustments, the Argon Ti is the lightest adjustable fixed frame chair on the market today.
