

SAME FEATURES AS INDOOR MODEL

The outdoor stair lift has all of the safety and comfort features included with our indoor unit, but is *designed and manufactured specifically for outdoor use.*

- Maintenance free DC battery power
- Easy to use joystick operation
- Diagnostic status lights
- Smooth start/stop action
- Lockable shut-off switch
- Swivel Seat
- Fold-up seat, armrests & footrest
- Infra-red remote controls
- Safety shut-off sensors
- Electronic and mechanical braking systems
- Near silent in operation
- 300 lb weight capacity (350 lb capacity available)
- Designed for simple DO-IT-YOURSELF installation

SPECIAL DESIGN PROTECTS FROM ELEMENTS

All metallic components are either made in aluminum, or are oil annealed or zinc plated before powder coating. Plastic components are heat and UV resistant, protecting the stairlift from color fading and ambient heat damage.

The *Brooks Safe-N-Easy Outdoor Stairlift* is an ideal solution for situations involving any staircase that is exposed to the elements, including *sun decks, porches, front steps*, etc. The *Outdoor Stairlift* is especially popular with those who live in *beach-front homes*, as it is well-protected from the ravages of salty air.

The *Brooks Safe-N-Easy Outdoor Stairlift* has a worldwide reputation for ride quality and performance. It is whisper-quiet, smooth, stable and very easy to use.

Included with the outdoor model is a durable *plastic cover* which protects the chassis from direct contact with the elements.
