

GTE

SERIES 4

ALL-TERRAIN POWERCHAIR

TREKINETIC

DESIGNED AROUND YOU BUILT FOR EVERY JOURNEY

From everyday journeys to off-road adventures. The GTE Series 4 is designed to give you your independence. Whether you're heading into town, exploring the countryside or tackling challenging terrain, it's lightweight and comfortable design gives you the freedom to *Go Anywhere*.

Hand-built in the UK and tailored to you. The GTE Series 4 offers more than **60 options and accessories**, allowing every chair to be configured around the way you live.

"I have been in the woods for the first time in three years, I have been on the sand at Dymchurch, I have zoomed through Canterbury over cobbles and uneven slabs... And, best of all, I had my first day out alone since having a stroke."

NEW Variable Camber System.

Worlds first dual mode camber system. Easily switch between Everyday (Narrow) and Off-Road (Wide).

Customisable.

Hand-built with over 60 options and over 200 colours, the GTE Series 4 is tailored around you.

Lightweight Battery

Easy to access and flight-safe lithium-ion battery, fitted in a convenient box under your seat.

NEW High Torque Motors.

2x 150W hub motors provides the GTE Series 4 100% more torque than previous GTE models.

Easy to Transport

Fits into a regular vehicle with or without the wheels on. Crash tested for use in a WAV.

Manual & Power

Change between manual and power modes at the flick of lever.

TURNING CIRCLE

A close-up, low-key photograph of a motorcycle's rear swingarm and shock absorber assembly. The swingarm is a silver-colored metal with several circular cutouts and mounting points. The shock absorber is a black, telescopic tube. The background is dark and out of focus, showing other parts of the motorcycle. The lighting highlights the metallic textures and mechanical details.

WHEREVER LIFE TAKES YOU

Versatile.

Tackle mud, sand, snow and gravel with ease, a 100cm turning circle for tight spaces indoors and around town.

Clinical.

Available with a wide selection of postural and clinical seating, tailored to each user.

Comfortable.

Our carbon fibre seat is naturally contoured, providing more support than a conventional seat.

Light & Compact.

Kids

Like all Trekkinetic wheelchairs, the GTE Series 4 can be adapted to accommodate children as young as 6 years old. We also support various 3rd part seating systems and fully moulded seating, where required.
