Trekinetic Unveils the GTE Series 4 at REHACARE: A New Generation of All-Terrain Wheelchair

Twenty years after launching its groundbreaking K2 all-terrain wheelchair, British manufacturer Trekinetic is unveiling the new GTE Series 4 at REHACARE 2026.

Combining F1-inspired engineering, lightweight carbon-fibre seat, tilt-in-space and variable wheel camber, the GTE Series has established a strong reputation in all-terrain mobility space. Now, with over 2,000 wheelchairs produced and two decades of engineering innovation behind it, Trekinetic is moving the GTE forward once again with the all-new Series 4.

Introducing the GTE Series 4

The GTE Series 4 has been developed over the past three years with the aim of delivering a new level of all-terrain performance and accessibility across home, town, city and off-road environments.

While the GTE Series 4 retains Trekinetic's F1 inspired, distinctive carbon-fibre monocoque chassis, nearly every aspect of the wheelchair has been redesigned.

- 100% more wheel-turning torque from the all-new 300W hub motors
- Revolutionary Variable Camber system*
- Lightweight all-terrain powerchair
- Exceptional hill-climbing performance
- Front-loading, long-range battery
- Class 1 medical device
- Crash tested
- Easy folding
- Remote tilt
- Integrated wheel guards

"After three years of painstaking redevelopment, pushing our own envelope even further, we have created what we feel is the world's ultimate, Dual-Purpose, Everyday and All-Terrain wheelchair, in one ultra light-weight and easily transportable package. Users will now be able to enjoy vastly improved off road ability, coupled with a surprisingly simple system, where wheel camber and ground clearance can be optimised, almost at will, instantly and effortlessly."

"I am delighted, that finally, with patents already filed, we can now share our discoveries with our customers, both existing and future"

- MIKE SPINDLE, TREKINETIC FOUNDER

The GTE Series 4 will make its worldwide debut at REHACARE 2026 in Düsseldorf, from 23 - 26 September, Trekinetic will showcase the GTE Series 4 in **Hall 5, Stand G-27**, giving visitors the opportunity to see the new wheelchair up close.

After twenty years of challenging convention, Trekinetic is ready to do it again. The next series of GTE starts here.

*Patent Pending

GTE SERIES 4

TOP SPEED
6 km/h

MAX RANGE
25 km

TOTAL WEIGHT
37 kg

MAX GROUND CLEARANCE
120 mm

HUB MOTORS
2 x 150W

ABOUT TREKINETIC

Trekinetic is a UK-based manufacturer of hand-built, all-terrain wheelchairs engineered with Formula 1-inspired technology. Its product range, including the GTE, K2, and K2 Plus One, are designed to give users the freedom to explore any terrain with confidence, combining premium engineering with a commitment to accessibility and independence.
