

Offers excellent seating comfort and many adjustment possibilities!

The *Rea Azalea* is the natural choice for the moderately active person and for the more passive person. The comfortable, tilt and recline seating system allows you to alter the seat position, ensuring maximum comfort at all times. This combined with good driving characteristics makes *Azalea* the ideal choice. *Azalea* is available as a transit with small rear wheels for attendant propulsion and also with large self propelling rear wheels, designed to promote independence allowing the client self propel. The Flex 3 backrest is multi adjustable in height, width and shape to accommodate a wide range of body shapes. It's available in 2 frame colours and 2 material options.

Features and Options

Tilt & recline makes life comfortable

The *Rea Azalea* has a 25° seat tilt and a 30° backrest recline. Both tilt and recline can be easily adjusted manually or electrically by the assistant and also by the client using the electrical version.

The backrest has a biomechanical positioning hinge, which follows a persons natural back movement when adjusting the backrest angle. Combined with the seat-tilt function, the DSS (Dual Stability System) helps to prevent Decubitus thanks to its non-friction re-body positioning.

Flex 3, backrest plate

Width adjustment is a standard feature of this backrest plate, along with an impressive range of height adjustment.

Flex 3, tension adjustable backrest

The tension adjustable option allows more challenging postures to be accommodated.

Wide range of options

Individual width adjustments in the armrests and legrests and a comprehensive range of accessories ensures all aspects of a persons comfort can be catered for.
