

A tailor-made solution for heavier people

The Rea **Azalea Max** is designed to meet the specific needs of people with extra weight. The Rea **Azalea Max** is a niche product which complements the existing **Azalea** family range from Invacare. The **Azalea Max** is available in Pearl Grey or Azurite Blue frame colours.

Features and Options

Continued Compatibility

The Rea **Azalea Max** offers the same features as the rest of the Rea **Azalea** family such as tilt-in-space with weight-shifting and DSS (Dual Stability System) mechanism. Stability in this wheelchair originates from body length compensation in the back and legrests, beneficial for people with limited movement who have difficulty changing position.

High ergonomic push handle

The ergonomically shaped push handles are positioned close together for easier handling. An alternate version with higher handles offers a different position for the hands and is available as an option.

Two-way backrest

The lower and upper parts of the shaped backrest are reversible, giving people the option of more space in the seat or chest area.

Footplate converter

Divided into three parts, the footplate comes with a removable mid section, to facilitate transfers.

Power tilt and recline

With the hand control the person using the chair or the attendant can easily change seating position.
