

Superior safety, stability and a sleek design

The *Invacare TDX SP2* boasts durability and ultimate performance. Great manoeuvrability indoors and out, with a wide choice of seating for optimum comfort and support makes this remarkable chair ideal for individuals who need full functionality, but do not want to compromise on style. Sitting alongside the *TDX SP2^{NB}*, it has a high weight capacity with large batteries and range ability. Key features include:

- Enhanced stability
- Intuitive driving experience
- Simply Smart LiNX control system
- Total Drive Experience

LiNX®

Enhanced stability

The **TDX SP2** is tried, tested and tough. Offering maximum stability and safety, the **Stability Lock** function ensures all six wheels stay firmly on the ground on uneven terrain. The patented **SureStep** suspension technology enables a smooth ride while negotiating challenging surfaces. With a high weight capacity and great driving range the **TDX SP2** enables you to go further.

Intuitive driving experience

Invacare **TDX SP2** individuals can say “Yes” to mobility and “No” to compromise. With an incredibly tight turning radius of 560mm, thanks to its Centre Wheel Drive construction, this remarkable wheelbase provides excellent manoeuvrability and an intuitive driving experience.

Simply SMART LiNX Control System

Invacare **LiNX** is our new insight inspired control system that learns over time to bring a revolutionary driving experience to individuals. Thanks to its unique modular design, this futureproof system can be seamlessly expanded and tailored to complement changing customer needs.

This Simply Smart technology has programming and maintenance updates that can be made wirelessly via bluetooth and in real time, making it easy to service. With easy access to statistical and diagnostic information, **LiNX** allows complete visibility. Features include:

Enhanced interface

The design of the controls has focused on ease of use, simplicity and reliability. The Simply SMART controls are easy to understand and use for everyone, including those with limited cognitive abilities. All controls feature an accurate battery gauge, a lower force joystick, a physical speed pot and an icon based menu for remotes with lights and powered positioning functionality.

Direct access to seating functions

This easily accessible optional 10-way switch is suitable for those who have difficulty reaching the buttons on the joystick or with their hand positioning.

Total control

For more complex control needs, **LiNX** improves functionality, driving control and performance while **G-Trac**® (optional) enhances this and ensures the directions indicated by the control are followed by the chair.

FEATURES & OPTIONS

SureStep® and Stability Lock

Patented **SureStep®** and **Stability Lock** technologies enables easy obstacle climbing and guarantee a smooth downward transition.

True Centre Wheel Drive

This driving technology allows excellent manoeuvrability in narrow spaces and ensures an intuitive driving experience.

Inspiring Design

The shrouds come in 7 contemporary colours and offer an elegant design with a focus on simplicity and detail.

LED Lighting system

Attractive, energy saving LED lights are an option that is integrated in a well-protected position in the rear shroud.

Seat Lifter

The seat lifter provides easy access to higher objects. The integrated tilt assists for relaxation and pressure re-distribution.

Powered fixed pivot tilt option

The simplified powered tilt option allows the seat angle to be repositioned by up to 20°.

Powered tilt-in-space

A maximum seat angle of 30° ensures comfort and safety as well as including a centre of gravity shift.

Side mounted legrest

Choice of manual or powered elevating versions that are compatible with other powerchairs.

LNX powered centre mount

The central legrest offers an active seating position and enables legs to be positioned at a 90° angle.

Powered recline

This option features a high pivot point for natural movement as well as a quick release mechanism for easy folding and transportation.

Telescopic inner frame

A dedicated lower profile inner frame, along with 'tilt' and 'lifter and tilt' provide an optimised 'seat to floor' height.
