

## Freestyle Back

The revolutionary JAY Freestyle Back offers comfort and style like never before. Available on the NEW Helium Next Generation Style, its unique, innovative design mirrors the natural curve of the back providing complete comfort all day long. Plus with no backposts to catch on, enjoy maximum upper body movement and direct access to the wheels for the most efficient self-propelling.

### Total Colour Coordination

Match the aluminium shell to the frame colour for a unique, stunning look. Alternatively, choose the carbon shell for the lightest possible option.

### Curved Back

Designed with a soft curve contouring to the natural shape of the back, the JAY Freestyle Back provides support and comfort like no other.

### Maximum Body Movement

With no backpost to catch on, the Freestyle Back's simple, clean design allows for 360° range of upper body motion, making daily tasks simpler and self-propelling easier with greater access to the wheels.

### Eye catching, modern design

As well as the numerous clinical benefits, the Freestyle Back is designed with style in mind. The clean, sporty look makes the Freestyle Back the ultimate style icon.

### Supportive Padding

Cleverly packed with intense padding, the user's back is supported at all times meaning they always sit in comfort and removing discomfort & fatigue that may result from using a less supportive back.

## HELIUM

NEXT GENERATION STYLE

Why not try it yourself? Experience the comfort of the JAY Freestyle Back first hand and the revolution of the Helium Next Generation Style - just contact your ASM for a demonstration.
