A Better Wheelchair, A Better Fit

NEW **BLAZER**

A COMPACT AND FRIENDLY SOLUTION

With a brand new look and thoughtful upgrades, the new Blazer is now offering an exceptionally narrow 580mm total width and foldable backrest. It is more compact and agile than its previous model, while maintaining its range of configurations with Sling seat and Captain seat options.

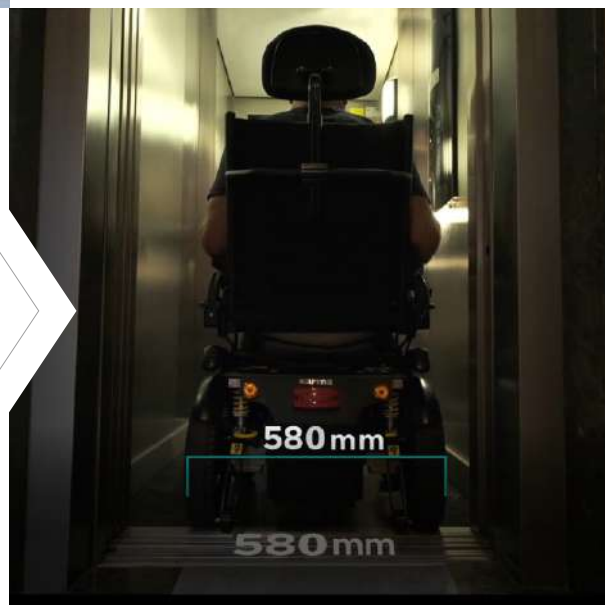

Easy to Transfer

The flip-back armrests and swing away footrests make it easy to get on and off the wheelchair or roll closer to a table. The armrest height is adjustable from 180 to 260 mm.

The detachable swing-away footrests allows for easy transfer, on and off the wheelchair and detaches with no tools required.

Excellent Indoor Maneuverability

The new Blazer's total width is just 580mm, making it one of the most compact power chairs on the market. It is smooth and easy to navigate through doorways, into lifts, or around confined spaces.

Great Outdoor Performance

The new Blazer is not only indoor friendly but also made for use outdoors. With its 2-wheel suspension and 9-inch front wheel, this new model guarantees a smooth drive in your everyday travel.

Adjustable Backrest Angle

The Sling Seat provides a tool-free angle adjustability (100°, 105° and 110°) for users to choose their most comfortable seating angle.

Foldable Backrest for Easy Storage and Transportation

The new Blazer is the best choice for those who need to transport their power wheelchair into a van to travel around with. The tool-free folding-forward backrest design is convenient for both storage and transportation.

Adjustable Seat Depth

The seat depth can be adjusted from 425 to 500 mm.

Contoured Adjustable Headrest

The height and angle of the headrest are both adjustable. The headrest is curved ergonomically according to the shape of the neck.

Compatible with Power Tilt-in-Space Modules

Blazer Sling not only offers 3 seat width options, it also provides 8° to 28° degree power tilt, which allows the user to easily change their position, thus shifting the pressure away from the hipbones and redistributing it over a larger surface area. This feature helps reduce the risks of developing pressure ulcers and avoid back pain.

Blazer Captain

The Blazer Captain Seat (KP-31.2 CPT) is anatomically contoured and offers great comfort with its manual recline function.

The chair is ideal for individuals looking for basic trunk control and a comfortable ride.

Manual Recline

The Blazer Captain Seat (KP-31.2 CPT) offers the ability to manually recline the backrest from 0°-56° or 0°-47°. This allows the user to stretch their hip joints and relax their back muscles.

Reflective design, improves safety.

Swing-away controller.

LED Lights enhances night-time driving safety.

Hand Bar to stabilize upper body.

Contour and thick cushion provides comfortable riding on off-road terrain.

Robust and Reliable

New Blazer is approved for transportation in accordance with ISO 7176-19 Crash Test. This means it is suitable to be used as a seat in a motor vehicle for transportation.

Optional Accessories

2-in-1 LED Lighting System

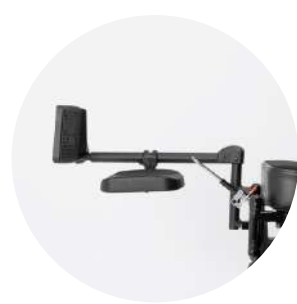

It is important for the wheelchair user to see as well as be seen at night. To improve safety, the Blazer can be equipped with LED headlights and taillights for better night-time visibility.
