

# Independence with Ergo Comfort

## Ergo Traveller

KP-10.3S

The new Karma “Ergo Traveller” is a lightweight, compact, manoeuvrable power chair which now incorporates Karma’s patented ‘S-Ergo’ seating system. It is compact enough for indoor use but powerful enough for outdoor use. The concept behind the design of the power chair was to make it as light as possible and convenient to transport.

The “Ergo Traveller” can be taken apart quickly and easily into four manageable components. The heaviest part weighs just 24kg. The quick release battery box has a convenient charging point built into it, which allows the batteries to be charged away from the power chair.

Why not try one at your local Karma retailer?

### S-Ergo

Pressure redistribution

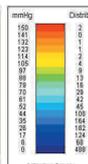

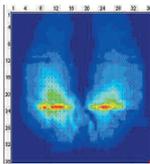

Reduced sliding

#### Traditional seat

Increased risk of sores due to load on pressure points.

#### S-Ergo seat

The S-Ergo system (intelligent s-shaped ergonomic seating) provides efficient pressure relief by spreading weight over a greater area, at the same time provides stability and reduces sliding.

Can be taken apart quickly and easily.
