

POWER GUIDANCE

Useful Information on Enhancing Battery Life

- Charge for 12- 24 hours before first use
- For the first month, carry out full cycle charges only. Refer to battery manufacturer for more details.
- Avoid deep discharge
- Charge for 24-hours if deep discharge has occurred.
- When vehicle use is finished, place on charge until next usage. Keep charging cycles to a minimum if possible.
- Never store used batteries in a discharged state.
- Always use the correct type of battery.
- Always use the correct type of battery charger.
- If not using the batteries for an extended period, charge the batteries for 24-36 hours prior to disconnecting & storing at room temperature.
- Wherever possible, store all new, used, and fitted batteries as close to room temperature as possible
