Invacare® Medley Ergo® Range Paint Colour Change

Invacare is committed to quality throughout its supply chain and manufacturing processes, and as a result we have decided to implement a **minor change** to the paint colour of the **Medley Ergo bed range and accessories**.

The change has been implemented to help enhance the performance of the paint coating when the products are washed within **automatic washing tunnels**. To help satisfy the current market trend of recycling community equipment, this new coating **further enhances the longevity of the Medley Ergo range** and ensures that it can be efficiently recycled and re-issued in the community.

Whilst the difference in colour is minimal and there is **no issue** with cross compatibility, a number of product codes for the beds and accessories within the range will change. To reduce the impact of the change, **only the last four digits of the existing product codes will be affected** with the suffix switching from **0152** to **7042**. For example:

1556664-0152 will now become 1556664-7042

1568728-0152 will now become 1568728-7042

Please note that **top level product codes, such as MEDERG-WS, will remain unchanged** and that Invacare will continue to offer spare parts in the previous colour for 5 years. As previously noted, cross compatibility between products in the old paint and the new paint is not an issue.

Should you require more information, please do not hesitate to contact Invacare Customer Services on 01656 776222, or your local Invacare Business Development Manager.
