

NEW Adjustable Shadow Tray

The newly designed Adjustable Shadow Tray, for the EasyStand Evolv, is even more modular and customizable. The Adjustable Shadow Tray provides constant anterior support by shadowing an individual throughout the sit to stand transition. This option provides a solution to changing needs for an individual and provides better support with height and depth adjustment; making it a perfect option for home or multi-user facilities.

- Covers the usable height and depth ranges for all six of the previous shadow tray options (*both standard and deep*).
- Retrofittable and available for the Evolv Medium, Large and XT
- Tray easily flips up with the lock and release system providing an open base when transferring
- Tray includes a chest pad but a large, contoured chest pad is also available as an option.
- Black Molded and Clear Acrylic trays are available.
- Height range is 7"-12" (17-30cm) with Black Molded Tray, 6"-11" (15-27cm) with Clear Tray, from the seat. Depth range is 4"-20" (10-20cm) measured from the back to the front pad.
