

A NEW BREED OF

PERFORMANCE

JIVE M²
SEDEO ERGO

JIVE[®] m² **SEDEO ERGO**

Take your seat and experience the revolution
in powered wheelchairs!

PERFORMANCE INSIDE & OUT

The Jive M² Sedeo Ergo redefines powered wheelchair technology, inside and out. Unparalleled outdoor performance combined with the ultimate indoor manoeuvrability, the Jive M² Sedeo Ergo not only makes it possible to have the best of both worlds – it also combines it with a revolutionary seating system to meet your every demand.

▶ **PREMIUM MID-WHEEL BASE TECHNOLOGY**

With next level SpiderTrac™ 2.0 performance

▶ **MODERN TWO-TONE LOOK**

Six striking colour inlays to vividly complement the sleek design

▶ **SAVE SIX SEATING POSITIONS**

Access six individually programmable seat positions at a touch of a button

▶ **LAY FULLY FLAT**

Enjoy an ergonomic laying position with a premium 175° backrest recline

▶ **NEVER LOSE CONTACT WITH YOUR FOOTREST**

Highly adjustable footrest with programmable length and angle

▶ **RECLINE WORKS EVEN WITH CHIN CONTROL**

Thanks to the unique 180mm anti-shear backrest system

▶ **EASY SEAT ENTRY SYSTEM**

With the swing-away seat cushion laterals

COMFORT

IN ALL POSITIONS

From seated position to full-recline, it will effortlessly and uniquely adapt and react to your body like no-other powered wheelchair in its class.

// MOST EFFECTIVE ANTI SHEAR MECHANISM IN ITS CLASS

Its patented unique mechanism allows the headrest, head and even chin control to stay in place during the full recline operation. The 175° power recline of the Sedeo Ergo backrest is supported by a 180mm adaptive anti-shear function.

// NEVER LOSE THE CONTACT WITH YOUR FOOTPLATE

Once set-up the articulating and elevating footrest maintains constant contact with your feet throughout the six programmable positions, ensuring your comfort and posture are maintained.

// UNIQUE BIOMETRIC REPOSITIONING

Advanced electronic programming has allowed us to create gateway positions that mimic more natural bio-metric movements, this means that going from one position to another maintains your pelvic position within the seat of the chair whilst the anti-shear back

maintains any supports or controls and the footrest ensures correct foot positioning. The result is a chair that naturally supports and hugs you in every position without the need to reposition yourself. You really need to try this chair to see how good it is!

CONTROL

AT YOUR COMMAND

The Jive M² Sedeo Ergo can remember up to six programmable custom seat positions that are completely unique to you.

// SITTING

Tailored to the amount of tilt, back recline, leg length and leg angle that you feel most comfortable with.

// WHATEVER POSITION YOU'D LIKE!

There are six customisable seating positions that can be programmed to suit you.

// LIFT POSITION WITH C-ME FEATURE

This position brings you at eye level with your environment. Due to the next level of base technology you can drive with speeds of up to 4.8kph (3mph) with full lifted seat position.

// LIE-DOWN

Relax, sleep or stretch - whatever you need to lay down for.

// LEGS OVER HEAD POSITION

Improve your circulation by elevating the leg supports.

// PRESSURE RELIEF POSITION

Using this function, the seat moves into a reclined, tilted and legs up position. This can be completely tailored to you.

// GET IN CONTROL

You can further customise your Jive M² Sedeo Ergo with a variety of special controls from Switch-It (a brand of Sunrise Medical). Different switch boxes enable you to control your seat functions with just one click. Alternatively, you can select the "Dual Pro" truly proportional head array or the "VersaGuide" compact joystick for an easy-to-learn, precise and intuitive driving experience.

INTELLIGENT MODERN DESIGN

Sharp-tailored upholstery, clean lines and slick minimalistic design that never fails to catch the eye.

// EASY ENTRY SYSTEM

The seat cushion is divided into three elements. The two patented lateral side cushions can be swung out and lifted off. This ensures a comfortable transfer position in-and-out of the wheelchair. In case of specific positioning needs, the middle part can be substituted by a JAY cushion.

// FIND YOUR PERFECT COLOUR

Create a personalised look with a selection of six striking colour inlays and change it when you feel like it.

// INFINITELY ADJUSTS FOR BEST FIT

The premium headrest can easily be adjusted or removed. ❶

All seat widths ❷ and depths ❸ of the Sedeo Ergo are infinitely adjustable with just one tool. Also, the seat and backrest width ❹ can be adjusted independently of each other. Even the armrest height ❺ and angle adjustment are just as simple to adjust too.

NEXT LEVEL OF BASE TECHNOLOGY

Our most direct and intuitive driving thoroughbred yet.

SPIDERTRAC 2.0 TECHNOLOGY

Smooth, safe and comfortable to ride across multiple terrains, the Jive M² Sedeo Ergo is more intuitive to drive, so it's ideal for those who may have difficulty driving a powered wheelchair or need to use switches or head controls.

// SUPERIOR OUTDOOR PERFORMANCE!

With its SpiderTrac 2.0 suspension, you're assured a smooth ride over uneven terrain with superb traction, excellent stability and minimal forward pitching – even when descending 10cm kerbs!

// EXCELLENT INDOOR MANOEUVRABILITY

Because the centre-of-rotation is located directly beneath you, the Jive M² Sedeo Ergo can turn on its own axis, giving an ultra small turning circle for excellent manoeuvrability.

Without Gyro Control Module

With Gyro Control Module

// GYRO CONTROL MODULE INSIDE

With the Jive's (optional) gyro-tracking system, there's no need to worry about stability on uneven surfaces anymore. Any small deviation from your intended direction is automatically detected and corrected, so not only are you safely kept on track on challenging surfaces, but it also makes for a less-demanding drive – especially if you require switch controls.

// APPROVED FOR TRANSPORT IN A VEHICLE

The Jive M² Sedeo Ergo is transit tested in accordance with ISO 7176-19 and approved for transportation in a vehicle.
