

doorline™-multi

“Designed to overcome PVC door thresholds”

PVC door threshold problems can easily be beaten with the innovative Doorline™-Multi. Now available in two sizes, this unique product rests securely on the threshold whilst spreading the weight and creating a strong edge nosing for any Aerolight® ramp needed for access from the outside. The result is a comfortable route all the way to the inside of the property.

Your benefits:

- ▶ Unique lip design with rubber anti-slip to safely eliminate threshold damage
- ▶ Designed for use with our NEW Aerolight® and Ultralight ramps to easily bridge any threshold
- ▶ Anodised finish for many years of service
- ▶ Extremely lightweight for quick and easy use, with full 300kg capacity
- ▶ Comfortable, fold-away, rattle-free handle

Registered Design

Unique lip design with rubber anti-slip secures on threshold while protecting door frame
