

## STX Air cushion

Based on the well proven original STX with its known-for structure and stability for the user, the STX Air now includes an optional air insert for enhanced pressure care. Featuring our advanced air system, it enables users previously bed-bound for extended periods and at very high risk of pressure damage, now to sit out to improve quality of life. This modular cushion ensures excellent posture control and can also be finely adjusted over time to meet the specific needs of users. For users with very high risk of pressure sores

### FEATURES & BENEFITS

- ★ **Advanced Pressure Management:** Integrated air insert for high-level pressure care.
- ★ **Superior Support:** High lateral and adductor pommel support for pelvis, hips, and thighs.
- ★ **Customizable Posture Control:** Fully adjustable contours to support symmetrical and asymmetrical sitting positions.
- ★ **Weight Redistribution:** Fluid gel technology to redistribute weight and relieve pressure on at-risk areas.
- ★ **Enhanced Comfort:** Comfort wrap for resilient comfort and cluster gel fluid packs for pressure equalisation.
- ★ **Postural Adjustments:** Adjustable positioning pads to address pelvic obliquity, tilt, rotation, femoral rotation, and wind-sweeping. Removable Thigh Wedges: Included to address hamstring shortening and other specific needs.
- ★ **Stability and Comfort:** Firm unique one-piece-base base for stability for maintenance of position
- ★ **Modular Design:** Built for the prescriber, allowing for component-based adjustments and long-term solutions.
