Total weight (g):

The weight changes based on the choices made below.

U3-light has a rigid rear axle. To find a balance that suits you, there are two versions, **U3 light** or **U3 light L**. L is more easy balanced and easier to drive on the rear wheels. You can tune the balance by placing the backrest in three different position. U3 Light has a seat height of 47 cm in front and 43 cm at the rear without cushion.
Max userweight is 100 kg for seatwidth 33-45.
