The Sedeo seating system...

It is our belief that ergonomic seating is the basis of an optimal mobility solution. Client needs are highly personal by nature. It is all about creating a seating posture which makes it possible to meet individual objectives related to physical support as well as social and practical challenges. The effective support of the body, particularly the pelvis and thorax areas. And naturally, an even weight distribution is essential to limit the risk of skin breakdown. All of this is fully reflected in our award-winning Sedeo seating system. Truly modular in design, Sedeo provides a new level of flexibility, comfort and design.

Sedeo combines a highly adjustable seat frame – Sedeo Lite and Sedeo Pro - with a wide range of support and positioning options, including a full range of high-quality seat cushions and backrests that can be easily customized to suit individual requirements, and quickly adapted to changing needs. To improve ergonomic seating and enhancing independence in everyday life, Sedeo is available on many different types of wheelchairs.

...ergonomic seating made easy

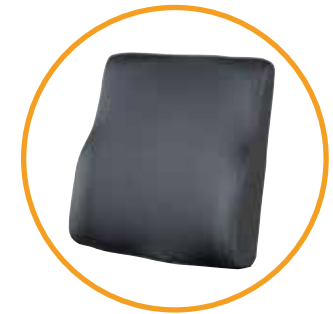

Choice of support & positioning options...

SEDEO PRO

...'mix and match' for the right fit

Sedeo offers you a wide choice of support and positioning options. Two seat frame types as a basis. Sedeo Lite, a no-nonsense, robust seat frame for those who can cope with sitting. Maximum user weight 130 kg. And Sedeo Pro, highly functional and adjustable for those who need positioning support. User weight up to 160 kg. Most Sedeo options, including a complete set of seat cushions, backrests, armrests and legrests, can be easily combined with both seat frames, providing an ergonomic seating solution. And allowing you to easily add and/or exchange components (upgrade) to adapt to changing needs.

High-quality seat cushions and backrests...

... to your personal needs. These may include enhanced postural stability, slouching prevention or easy transfers - just to name a few. No matter what challenges you are facing, creating a solution for you to meet your specific objectives is essential. This requires the right level of support in particular the pelvis and thorax areas.

A wide range of comfort seat cushions and backrests, each with their specific properties to meet your needs. Naturally, they also optimize pressure distribution and avoid shear forces to limit the risk of skin damage, which is particularly important if you sit in your wheelchair for extended periods of time. New breathable and washable cushion covers - with zippers - ensure good hygiene.

Choosing the right ergonomic seating than choosing the right cushion. Only when combined with an appropriate wheelchair frame – armrest height, legrest length, seat angle etc. – maximum seating comfort can be achieved.

table...

al seating needs today and in time, you want total flexibility. That is why our Sedeo
ly offers a wide choice of support options, but is also fully adjustable. All adjust-
mon adjustments like seat depth and width, backrest angle and height, legrest
h, armrest height and depth, and headrest height - can be done quickly and easily,
ing posture for you. And allowing for easy customisation in case of changing require-
ving characteristics, just change the centre of gravity by repositioning the complete
r. You will keep all your personal adjustment settings – and thus a perfect fit.

... quick and easy to suit individual needs

Easy to work with...

Sedo is a seating system that works for the healthcare professional. A modular design of interchangeable positioning options combined with high adjustability allows them to fit for each client. Also in case of changing needs or re-use. Quick and easy to adjust with measuring scales and one simple working routine - using just ONE tool delivered with more personal attention. No extra parts are required. Moreover, Sedo fits on most of the existing frames. Easy to clean with waterproof, breathable and washable cushion covers, and high finish.

Easy to use...

Naturally, a good seating solution provides you with excellent positioning support. Yet, for independence in everyday life, it must also be highly user-friendly. This is reflected in the design of all Sedeo operating levers. Clearly visible due to a light-grey colour, all adjustments are easily accessible. Low operating forces are required. Swing away or remove your armrest for an easy transfer.

... maximum independence

Co-designed with industry experts...

Sunrise Medica has a reputation for high quality and safety. This is also reflected in this system. Developed and designed in close cooperation with international industry experts, it has raised the bar. State-of-the-art manufacturing techniques and high-quality materials help ensure durability. And the system has been tested beyond the highest industry standards through strength tests for all individual parts. While creating a highly functional, ergonomic solution, however, we have certainly not overlooked the importance of aesthetics. This is reflected in the first 'Good Industrial Design' award winning seating solution out there.
