

## TRACTION DIRECT CONTROL

Triride presents the new electronic traction control system MDC - Motion Direct Control. With a single command (accelerator) it is possible to have the complete management of the Triride movement.

## FEATURES

- **Hill Holder system**  
Hill start assist control
- **Descent system**  
Downhill traction management
- **Regen System**  
Autocharge battery during braking

**EXCLUSIVE  
MADE BY TRIRIDE**

## MAXIMUM SAFETY - MAXIMUM CONTROL

The new electronic traction control system MDC - Motion Direct Control is also applicable to the push&pull lever for tetraplegics and therefore is an unprecedented safety feature for this type of device.

## COMPLETE MOVEMENT MANAGEMENT WITH ONE COMMAND

The system can be activated and deactivated with a specific command.
