

ultralight™ -combi

“Amazing versatility for straight or up-and-over use”

This unique product is both folding and telescopic, making it one of the most versatile ramps on the market. Also available in an even wider channel option.

Your benefits:

- ▶ Low kerbs and long bevel sides greatly increase clearance for scooters and power chairs
- ▶ Good choice for bridging a threshold with unequal levels each side
- ▶ Wide channels as standard, with extra-width options for larger mobility devices (see PCW codes)
- ▶ Seriously lightweight, and incredibly compact for storage and stowing in a vehicle
- ▶ One solution for many applications
